MILES OF POSSIBILITIES

Thank you for considering an investment in Fort Wayne Trails, Inc. We are excited to partner with you in bringing more trails to the people of Allen County and getting more people on those trails.

These events offer your business the opportunity for significant market exposure while being associated with a beloved community asset. There are currently over 145 miles of paved, multi-use trails in Allen County, with over 1 million trail uses counted in 2024 and that number continues to grow.

Trails are a tremendous community asset. They provide safe, accessible, and enjoyable options for exercise, transportation and recreation. Not only have trails been shown to benefit community health, but they also play a large factor in an areas' "livability" and quality of life.

Trails help with environmental conservation by preserving green spaces. Trails also support historic preservation as many trails preserve historically significant corridors. Trails have also been shown to have a positive impact on local economies and spur economic development or redevelopment.

Though we partner with municipalities throughout Allen County, Fort Wayne Trails receives no government funding. Trails now cost an average of \$1.2 million per mile to build. Your sponsorship makes a difference!

Thank you for helping to connect people one trail at a time.
Sincerely,

Nicole Funk-Evard
Development Director

P.S. If you have an idea of another way that we can partner with your business, please reach out to me. I would love to hear your ideas.

“This was a great way for me to grow more of my business and I am definitely planning to sponsor more of your events.”
